

REALGI HILA

Software Engineering Student

☎ +31 6 16 47 04 89

✉ hrealgi@gmail.com

Eindhoven, Netherlands

SKILLS

Languages: C#, Java, JavaScript, SQL, Python

Backend: ASP.NET Core, Spring Boot, REST APIs, Flask

Cloud: Ubuntu Linux

Frontend: React, HTML, CSS, Flutter

Databases: Microsoft SQL Server

Tools & Concepts: Git, GitHub, Visual Studio, VS Code, Jira, SCRUM, SOLID, MVC, Three-Layer Architecture, Unit Testing

EDUCATION

Fontys University of Applied Sciences | Eindhoven | 2025 - Present

BSc Software Engineering

Relevant coursework: software architecture, databases, REST APIs, full-stack development, testing and Agile/Scrum.

PROJECTS

Youth Fit Web Application | C# / ASP.NET Core (Semester 1)

GitHub - <https://github.com/Realgi022/YouthFit.git>

- First semester project learning the basics of coding and only using Razor Pages

Youth Fit Web Application | C# / ASP.NET Core

GitHub - <https://github.com/Realgi022/Sports-community.git> (Semester 1)

- Developed a sports community web application where users can log in and access community features such as **chat, forums, and event organization**.
- Built the backend using **Python and Flask**, including session-based authentication and protected routes, with HTML/CSS/JavaScript for the frontend.

Football Betting Web Application | C# / ASP.NET Core / SQL Server (Semester 2)

- Built a full-stack betting simulation using a three-layer architecture.
- Implemented authentication, wallet and betting functionality, admin features, DTOs, dependency injection, and unit/integration testing.

Secure Access - QR Authentication System | C# / ASP.NET Core / SignalR (Semester 2)

GitHub - <https://github.com/Realgi022/Secure-Access-group-project.git>

- Developed a QR-based authentication flow with real-time access notifications.
- Used SignalR and database persistence for access and session management.

Mini Canvas - Learning Management System | Java / Spring Boot / React / SQL (Semester 3)

GitHub - <https://github.com/Realgi022/MiniCanvasProject.git>

- Developing REST APIs for courses, assignments, submissions and grades.
- Applying SOLID principles and a structured three-layer architecture.

Financial Management App (Erasmus Finland Project) | C# / ASP.NET Core / Rest APIs (Semester 3)

GitHub - <https://github.com/Realgi022/fm-backend.git>

- Trained an AI that automatically fills receipts by just scanning (taking pictures)
- Developed a full-stack application in an international team using **Agile/Scrum methodology**.
- Worked with **Jira, sprints, user stories, and backlog management**.

WORK EXPERIENCE

[Mojo] | Eindhoven | [October 2025 - Present]

[Kitchen Crew Member]

- Assist chefs with food preparation and ensure completed dishes are ready for waitstaff to pick up.
- Work efficiently in a fast-paced environment while maintaining clear communication with chefs and other team members.
